

THE GLEICHEN CALL

VOLUME XXVIII NO. 20

GLEICHEN, ALBERTA, WEDNESDAY OCTOBER 3, 1934

SUBSCRIPTION \$2.00 PER YEAR

VICTORY BOND CONVERSION HELPS BUSINESS RECOVERY

The Prime Minister's frank concise statement regarding the Reimbursement Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labor leaders throughout the country. The concrete evidence of business recovery from the low point of last year which Mr. Bennett stressed in his opening announcement such as a 50 per cent increase in industrial production, 17 per cent increase in employment, 43 per cent increase in farm products prices, as well as a substantial improvement in carloadings, electric power production and wholesale prices, emphasizes the strengthening of the national credit, the progress in achievement of national economy and the steady general upturn in business.

Completion of this year's refunding program will bring the total war loan refinancing (inaugurated in 1931) to over \$1,000,000,000.

\$9,000,000 per annum has already been saved in interest charges. When this year's operations are concluded, the annual saving in interest will be about \$14,000,000. This saving more than offsets interest charges on debt incurred to meet the extraordinary burdens incident to unemployment, relief, and eventually should enable the government to reduce taxes.

The tenor of the comments from bankers, insurance and trust company executives, industrialists, agriculturists and labor leaders is amply summed up by the unanimity of their opinions, which are that Canada has emerged from the depression with probably less strain than that experienced in many other countries; and that, while our progress is gradual, it is well founded. There have been no disturbing recessions consequent upon too rapid a rise.

The consensus of opinion is that by reason of the favorable basis of conversion and the attractive yield offered (particularly in the long term bonds) the majority of 1935 Victory Bond holders will convert and new investors hasten to secure an allotment of the new bonds.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

October 1st, 1914. The Blackfeet Indians have voted \$12,000 for war purposes and pledge their support. The petition was signed by: Chief Iron Shield and Chief Yellow Horse, and headmen Sitting Eagle, Wesel Calf, Water Chief, Wolf Calf, Stabbed Last, Hind Bull, Spring Chief, Calf Bull and the witnesses were J. H. Gooderham and Teddy Yellow Fly, the interpreter. V. C. Guay is now building a new home at Ouelletteville and it will be the most modern in the district. Postmaster Ramabottom moved into his new post office building last Thursday evening. Mike Brown was seriously hurt over a week ago in an automobile accident but is now rapidly recovering. Mrs. Hogg returned Monday from Banff. The exhibit from Gleichen at the rigation congress will be excellent. It is reported that Irene McLean had the misfortune to break her arm Tuesday. Particulars are not available of the accident. J. P. Nelson was in from Standard and said he had 50 acres that went 30 bushels to the acre. A meeting was held in the Opera House to organize a Red Cross society for Gleichen. Mrs. Broussau and Edna returned by the provincial department of agriculture. Carloads have been shipped to the districts concerned.

Mr. and Mrs. Thos. Till were in from Bushbuck Creek transacting business. Olga Kierstein left recently to attend high school at Melville, Sask. It is pleasing to learn that Steve Williams is improving in the Calgary hospital from a severe attack of typhoid fever. H. Chiversen returned from Calgary where he had been seriously ill with typhoid fever. Saturday afternoon W. B. McKie's truck near gave Calgary automobile.

News Items of Local Interest

Saturday evening the Community Hall was jammed to capacity during both shows by people who wished to see the picture "Tarzan and his Mate." All who saw it state that it is a wonderful picture.

The Gleichen hockey boys are putting on their annual dance Oct. 19th. Gleichen expects to have a powerful team this year and the hockey club earnestly request you to keep the date of their big dance open and attend.

Saturday a crew of men with two teams were put to work leveling the ground at the rink. It now looks to be in great shape.

Another big show is billed for next Saturday evening at the Community Hall. It will contain two special features also news and shorts. The prices will be adults 35c, no tax charge. Children under 14 years of age will be charged 20c.

Mrs. Jas. McIney and Miss L. Cunningham of Arrowwood spent Tuesday in town attending the funeral of their brother Mr. W. H. Cunningham.

Don't forget the Canadian Legion dance at Milo next Friday evening. October 5th. A good time is assured those who attend. A Lethbridge orchestra will supply the music.

John T. Dawson, age 56 years, an inmate of Everetts Home died in the institution last Thursday. He came to the home some ten months ago from near Edmonton. Mr. Dawson was born in Australia and came to his country at the age of six years. The funeral took place Saturday afternoon at Everetts cemetery, with Adj. Sutherland conducting the service.

A series of community life conferences is being planned by the department of extension of the University. The first of these will be held at Lethbridge on October 19 and 20 in co-operation with the educational committee of the Lethbridge U. C. A. The conference has as its objective the mobilization of the resources of rural and urban communities for the purpose of stimulating intellectual growth and development.

Fraser Hunt, associate editor for years of Cosmopolitan Magazine, who owns a ranch in Alberta near E.P. Ranch, has just arrived for the fall season at his Alberta headquarters. In an interview, he said "I am an Albertan and prefer here to anywhere else in Canada or America."

The Girl Guides will hold their annual campout on Friday, October 12th, at 8 p.m., in the Odd-fellows hall. Everybody is invited to attend, and all are assured of a good time. The admission price will be 25c.

The friends of Art McDonald are pleased to see him back in town again after an absence of several months.

Figures from ports of entry at Carway and Coutts, Alberta reveal that this season the tourist traffic showed substantial increase over last year. At Carway near Carleton Place, total passengers this year entering in cars were 30,536 compared with 22,347 passengers last year and at Coutts the figures were 39,432 compared with 27,587 last year.

Handsome donations of vegetables have been made by a number of communities to families in the dried out areas in response to a recent appeal made by the provincial department of agriculture. Carloads have been shipped to the districts concerned.

Sunday a stiff wind helped very materially dry up the stocks of unthreshed grain. Monday saw threshing begin in various places and on Tuesday it had become quite general. Given a week of more fine late a severe shock by winning the five mile race for small cars, and it is generally believed would have won the ten mile race and cup had it not been for an accident.

weather, threshing in this vicinity should be pretty well cleaned up.

Joan and Keith Ostrander, accompanied by their grandmother, Mrs. J. E. Ostrander returned to their home at Broadview last week. To two children are still quite weak from their seizure of typhoid fever and it will be sometime before they will fully recovered. Mrs. Ostrander will remain in Broadview for a time visiting her son, Pember and family.

C. B. Hyndman, ex-mayor of Gleichen has been visiting friends in the district for the past week or two, since leaving Gleichen seven years ago with his family. Mr. Hyndman has lived in Vancouver. Owing to indifferent health he has been compelled to leave the coast city and return to Alberta where he finds the climate very beneficial. Mr. Hyndman does not know yet where he will locate and settle down. He thinks the Gleichen district the best in the province.

OST-Wire-haired terrier with collar, last Sunday Finder notify R. S. Taskayne. Lost in Gleichen.

PROPOSED TO FORM CANADIAN WHEAT INSTITUTE

Proposals for forming the Canadian Wheat Institute as a national body to conduct work in the interests of Canadian wheat were endorsed by the annual convention of the Canadian Chamber of Commerce which met in Winnipeg on September 14th, 12 and 13th. This followed an address by Mr. R. S. Law, president of the United Grain Growers Ltd., in the course of which he dealt with the need for putting a new force behind the sale of Canadian wheat and showed how through the proposed institute, advertising, commercial research, scientific research and other efforts might be brought to bear towards the enlargement of outlets for Canadian wheat.

Mr. Law spoke on the subject "Wheat from the National Standpoint" and much of his address was devoted to emphasizing the national importance of the wheat industry of Canada. In emphasizing that fact Mr. Law said: "It should be realized that growing wheat for export has been part of the basic policy of Canada for a third of a century. Upon it is founded the immigration policy of this country and the whole project of opening up western Canada upon it was predicated a large part of the country's railway construction and the building of canals and harbors. That western Canada should be opened up, that people from other parts of the country and from other countries should be invited to come in, that financial institutions should pour their resources into the prairies and that factories should be built to supply the needs of farmers who were to grow wheat—all that was part of the national determination of the country since the beginning of the century."

In concluding his address Mr. Law said: "The welfare of the western farmers the welfare of Western Canada, and to a large extent the welfare of Dominion of Canada must continue to depend upon our ability to maintain large outlets for the wheat grown in the west, and that in turn may well depend upon our ability to keep a national understanding and maintain a national outlook on our wheat problem."

The resolution which was subsequently passed by the convention of the Chamber of Commerce read as follows: "Realizing the importance of Canadian wheat production to the prosperity of Canada, the chamber has been gratified to learn that those directly interested in the production and marketing of Canadian wheat have under consideration the organization of a Canadian Wheat Institute as a national body to stimulate the marketing and use of wheat in the markets of the world. The chamber extends its closest co-operation in this endeavor."

The annual meeting of the Gleichen Hockey Association brought the spotlight again onto this wonderful sport. The Canadian Bank of Commerce premises were crowded with fans eager to organize for the coming season and to elect its officers for the ensuing term.

James Black was re-elected president of the club. Mrs. McConnell again is the business manager since he so ably piloted the financial ship during the past season. W. Sutermeister is the secretary-treasurer also for the second term. The full slate of officers contains Geo. Gooderham, hon. pres.; James Black pres.; R. W. Brown, sec. vice-pres.; Wm. McConnell business manager; W. Sutermeister, secretary-treasurer; Al Wilson, Dr. McIntyre, S. E. Lester, additional members of the executive council.

A proposal was received to form

WM. H. CUNNINGHAM DIED EARLY SUNDAY MORNING

William Henry Cunningham, aged 72, died rather suddenly at 3:30 Sunday morning, at his farm home eight miles northeast of town. Mr. Cunningham had been enjoying very good health, but at times his heart troubled him. Saturday evening he did the usual chores around the farm. At midnight he had a bad heart attack but after a time appeared to be alright. A few hours later he was seized with another attack and before the family realized the seriousness of it had passed away.

Deceased was born in Juneau County, Wis. In 1897 at Owatonna, Minn., he married Miss E. Smith. In 1918 he left Owatonna with his family and moved to Gleichen, and buying a farm has been in the district ever since. Besides his widow there survive him two daughters: Mrs. V. Green and Mrs. A. Savoy, Gleichen; three sons: John of Port Dodge, Iowa, William H. at Calgary, Raymond P. and James at home; two children predeceased him in infancy; two sisters Mrs. Jas. Mooney and Miss Cunningham of Arrowwood. Tuesday morning at 10 o'clock Requiem mass was celebrated at St. Victor's Church by Fr. McCormack which was largely attended, after which burial took place in the Gleichen Catholic cemetery. The pallbearers, friends of many years, were: Messrs. J. Menard, L. Nerland, J. Ramsay, Mr. Chartrand, L. Desjardine and H. Sammons.

Funeral arrangements were in charge of G. W. Evans.

U. F. W. A. HAVE REGULAR SESSION LAST WEEK

A very profitable and enjoyable afternoon was spent by twenty-five members and three visitors of the U. F. W. A. at the home of Mrs. A. Quinnell on Thursday, September 27, at the regular meeting.

The evening was followed by the roll call of "A Home Remedy." Mrs. Ethridge read a bulletin on "Co-operative Effort." Mrs. Garland gave a very splendid paper on common diseases, such as dyspepsia, scurvy fever, infantile paralysis, chicken pox, etc. This paper was very instructive and very much appreciated by all.

Archie Quinnell sang a little song. The next meeting will be held at the home of Mrs. J. C. Hatcheson instead of as scheduled.

F. W. GERSHAW, M.P., TO SPEAK AT CLUNY WEDNESDAY

A meeting under the auspices of the Cluny Liberal Association will be held in the Herman hall there next Wednesday evening at 8 o'clock. The speaker for the evening will be Dr. F. W. Gershaw, M.P., for the Medicine Hat constituency which will include this district in the next election. All are cordially invited to attend.

GOOD ATTENDANCE ANNUAL MEETING HOCKEY CLUB

The annual meeting of the Gleichen Hockey Association brought the spotlight again onto this wonderful sport. The Canadian Bank of Commerce premises were crowded with fans eager to organize for the coming season and to elect its officers for the ensuing term.

James Black was re-elected president of the club. Mrs. McConnell again is the business manager since he so ably piloted the financial ship during the past season. W. Sutermeister is the secretary-treasurer also for the second term. The full slate of officers contains Geo. Gooderham, hon. pres.; James Black pres.; R. W. Brown, sec. vice-pres.; Wm. McConnell business manager; W. Sutermeister, secretary-treasurer; Al Wilson, Dr. McIntyre, S. E. Lester, additional members of the executive council.

A proposal was received to form

Penny Wise

There is no heat value in ashes, rock or bone, yet these all count in weight you pay for when buying inferior coals.

Our stock is fresh and free of impurities. From the highest grade coal mines in Alberta. Our selling price is based on cash buying and low expense ratio and gives our customers real value.

a league between Banff, Canmore, Strathmore and Gleichen, and it possible add one good intermediate team from Calgary, the league to be called the Central Alberta League. Gleichen has voted in favor of such a league. Steps are now being taken to materialize this proposition.

A dance under the auspices of the hockey club will be staged in the near future. Geo. Allistot, Camp Brown and W. Taylor were appointed a committee to organize this event. The executive was instructed to meet the Athletic Club executive in order to make playing arrangements with the rink committee for the coming season. The question of a coach was left open for the executive council to deal with.

The treasurer's and auditor's report were received and accepted as read. A very small balance is found to be on hand with one or two outstanding accounts to be paid. In view of the fact that new uniforms will have to be purchased this year, funds will have to be raised.

It is also hoped that some arrangement can be made with the rink committee of a slightly higher percentage to be received by the hockey club, which would make financing of the organization considerably easier.

The meeting was very enthusiastic and the general feeling was that Gleichen hockey fans can well look forward to perhaps one of their most interesting seasons for this truly Canadian king of sports.

"Fresh from the Gardens"

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous cup and setting forth the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday toils and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the inculcation and development of those traits of character which recognize and insist upon respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to skill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people stand the stands to watch eighteen highly trained experts "play" ball. These thousands cheer and boo for the "home" team, although not one of the "players" may be a native son or even a resident of the home city, but imported men from anywhere simply because they have the knack to excel in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized to the nth degree to make money for the owners of the franchise and their high-salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money grabbing instinct of men. Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the advertised sports to carry the college colors to victory or to gross material wealth with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is time a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Use Ultra-Violet Rays

Planes Equipped For Toning Up
Dials On Instrument Board

Ultra-violet rays have become standard equipment on aeroplanes engaged in night flying.

Pilots found that the radium dials of the instruments and gauges became dull unless radiated occasionally. So ultra-violet rays boxes were installed.

The boxes, not much larger than safety match holders, are fastened to the steering post arms in the planes. Since ultra-violet rays are invisible there is no reflection against the windshield when the pilots are them.

Monkeys Have Gone Nazi

Animals In London Zoo Give Salute To Visitors

A special cable from London to the New York Herald Tribune says the monkeys of Regent Park zoo have gone Nazi.

In a recent week, it appears, a German visitor to London taught Jimmy, one of the zoo's chimpanzees, to give the Nazi salute in return for bananas. Other Simians promptly imitated him, and to-day the entire monkey house was enthusiastically giving the "Heil Hitler" with upraised paws whenever visitors arrived.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new untried remedy, but take Dr. Fowlers Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowlers" when you ask for it.

Put up only by The T. Milburn Co. Ltd., Toronto, Ont.

Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the dogged Welsh of England colliers who conducted him round the mine.

Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole."

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay in the prince's duchy estate.

The prince lent a sympathetic ear to the colliers' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The men set to work. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paying for itself. Fifty men are in full-time employment; one hundred and thirty-five tons of household coal are raised every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal welcome from the black-faced colliers. Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal.

He respired, his hands were black from the low currents where he had bent almost double.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong.

Read what he says:—"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks to the Kruschen Salt. It has been my life-saver in my time, and I have recommended them to many. I could not get in or out of bed myself for weeks. But see me work now—12 hours a day sometimes. Kruschen Salts have done it."

Rheumatic conditions are the result of an excess of uric acid in the body. The Kruschen Salts are a powerful solvent of uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent fermentation in the intestines, and thereby check the further accumulation of uric acid, but of other body poisons which undermine the health.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-tailored young man in brown soft hat and brown shoes was exploring an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage—or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent, in wheat; a decrease of 79,000 acres or 2.3 per cent, in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent, and rye also increased by 149,500 acres, or 28.7 per cent.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada. Hon. George H. Sedgwick, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

A tax of about 10 cents a gallon is levied on gasoline in England.

W. N. U. 2085

Air Survey Reveals Ruins

Ancient Earthworks Sunken For Centuries Were Invisible From Ground

A moundbuilders' ceremonial chapel and an ancient roadway, approximately two and one-half miles long, were discovered for the first time near Newark, Ohio following completion of an aerial survey by Captain A. W. Stevens, intrepid army photographer and participant in the recent ill-fated attempt to invade the stratosphere.

The discovery was made by Dr. Henry C. Shetrone, archaeologist and director of the Ohio State Museum while examining air photographs taken by Capt. Stevens at museum offices in Columbus, Ohio.

Invisible from the ground, these once mighty ancient earthworks, believed constructed by Hopewell Indians, have lain sunken for centuries unnoticed by residents of this vicinity.

The roadway, which is 150 feet wide, is of perfect geometric proportions and indicates that people of the Hopewell era had some knowledge of that mathematical science, museum officials believe.

A keyhole-shaped figure on the air photo, the chapel, which lies at the road's southwest terminus, is approximately 200 feet in diameter at its circular part and is believed to have been a ceremonial oracle of the Hopewell tribes.

Located between two perfectly proportioned circular Indian mounds southeast of the city, the territory in which the new discoveries were made has long been a mecca for archaeologists and tourists.

Tunnels and elaborate underground burial rooms similar to those found in the world famous Ogden Mounds near Leavenworth, Ill., also products of Hopewell culture, might be found as a result of the new discovery Shetrone believes.

First research of the Newark Indian burial grounds was made in 1849 by Squire and Davis, early archaeologists who explored Ohio and the Middle West.

Although they indicated the beginning of the roadway in maps filed with the Smithsonian Institute in Washington, no further trace of the earthworks had been discovered until the air exploration by Captain Stevens, museum officials say.

When Duties Are Divided

Work Is Very Seldom Done As It Should Be

Affairs at the French ministry of finance, where the windows are never clean because, as someone has just discovered, the ministry of finance is responsible for the inside and the ministry of fine arts for the outside, and the two ministries never arrange to clean both sides at once, had an almost exact parallel nearer home in early Victorian days. When the prince consort began inquiring into arrangements at Buckingham Palace, which he found far from satisfactory, he was informed that the lord chamberlain had charge of all the interior rooms except the kitchens and pantries, which were under the lord steward, while the exterior came under the office of works and forests, and that they likewise failed to synchronize in cleaning the windows.

On demanding why there was never a fire in the dining room, he was told "The lord chamberlain lays the fire, and the lord steward lights it." As the underlings of those two great officers were in disagreement the queen was left to dine in the cold.—Manchester Guardian.

Need Coin-Container

Philatelists Sending Money Through Mail Use Variety Of "Stickers"

A crew of 15 postal clerks at Yellowstone Park, Wyoming, which handled the 90,000 requests for first-day covers on the new Yellowstone stamp issued recently, wonder why someone has not invented a special coin-container for philatelists.

Collectors sending in five, ten, twenty-five, and fifty-cent pieces used every conceivable method in making the cash enclosures with the envelopes which they wanted to carry the new stamp as well as the cancellation mark from the Yellowstone post-office on the first-day covers. Tar, adhesive tape, molasses, wax, honey, chewing gum and syrup were among the varieties of "stickum" employed.

The clerks all exhibited sore thumbs and fingers from licking for the well-protected cash.

Delaware, with only three, has the smallest number of counties of any state in the United States.

If some men would work more and hope less they would get along better.

Cook's Home Rebuilt

In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 253 boxes and transported by 35 lorries, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as one wit remarked. Stones for the walls flagstones for the floor joists, rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be much use for hammering in, but interesting as showing the type used.

The ivy which will not be replaced in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of diseases. In exchange for the cottage, Cook's birthplace, Great Ayton, Yorks, is to possess a stone obelisk modelled on the monument commemorating his discovery at Cape Everard.

Fall rye in Canada, as at August 10, 1934, shows a yield of 5,239,000 bushels from 587,100 acres, compared with 3,454,000 bushels from 434,900 acres in 1933.

Of 35,500 insured workers in Luton, England, only 700 are out of work.

Lignite Coal

Development Of Coal Field In Saskatchewan Carried On Successfully

Development of high moisture lignite deposits in southern Saskatchewan, which are located a considerable distance to the east of other fuel sources of Western Canada, has been carried on successfully through the depression years. R. L. Sutherland, consulting engineer for the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years when the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel.

Roman coins were minted in the temple of Juno.

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, sides them over Change of Life... makes life seem worth living again.

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OBTAIN RELIEF IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain. Demand and get the method doctor prescribes—**Aspirin**.

Millions have found that **Aspirin** eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

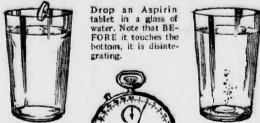

In the stomach as in the glass here, an **Aspirin** tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, **Aspirin** is **safe**. For scientific facts, see **Aspirin** does not harm the heart.

Remember these two points: **Aspirin** Speeds up **Aspirin** Relief. And, see that you get **ASPIRIN**. It is made in Canada, and all druggists have it. Look for the name **Bayer** in the form of a cross on every **Aspirin** tablet.

Get 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach. As soon as the tablet starts "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures
—ASPIRIN DOES NOT HARM THE HEART—

Scientists Have Solved Puzzle

Discover Reason Modern Leather Book Covers Do Not Last

Books from the libraries of Buckingham Palace and Windsor Castle have enabled scientists to solve the riddle of why modern leather book covers are comparatively short lived. As a result of experiments recently carried out here, leather-bound books will once again be made as nearly immortal as are most royal possessions.

The secret, it has been found by the British Leather Manufacturers' Research Association, is that the modern process of mass production dyeing takes from leather just those chemicals which enable it to resist the acid-laden air of British towns. Two pairs of book covers from the British royal libraries clinched the diagnosis. One, on Diarrell's letters had been in the smoky air of London, and wherever the cover had been exposed it was powdered and worn. Diarrell was British Prime Minister in the Victoria era. The other on the letters of Lord Salisbury, another of the Victorian Prime Ministers, had passed its whole life in the purer air of Windsor and was almost perfectly preserved.

A chemist got to work and was able to prove that the leather, which was worn, had absorbed appreciable amounts of sulphuric acid which could not have been introduced during manufacture.

Other book covers from all over the country told the same story. Sulphuric acid was to blame. But there remained the question of why books bound before 1850 were more resistant. It was found that old book covers, dyed individually, retained certain chemicals which modern books lacked.

Finally, it was proved that the necessary chemicals could be reintroduced at no appreciable cost after the dyeing process.

By a curious coincidence Faraday Innes, the young chemist responsible, is a collateral descendant of the famous scientist, Michael Faraday, who, so far as is known, was the first man to devote scientific attention to the powdering of leather.

Michael Faraday was appointed to a bookkeeper before he took to science, and in 1842 was asked by the Athenaeum Club to investigate why the club armchairs were so badly worn. His diagnosis, it has now been established, was correct.

"To complete the circle," Dr. Jordan Lloyd, the director of the labor-

atory, commented recently, "The same treatment that will save book covers will also give longer life to leather upholstery, although the enameled leather used in automobiles is already sufficiently protected."

Walking As Exercise

It Relied On Entirely Make Sure You Get Plenty

"Walk for health!" is the slogan to-day and it was recently suggested that, in spite of the amazing development in hiking, there were still too many young people who didn't walk enough. It has been calculated that, in walking a mile, the average person takes 2,262 steps. In cycling a mile, the exercise taken is equivalent to 627 steps, which means that the cyclist has to cover about three and a half miles to get the same amount of exercise that the walker gets in one. This is an interesting comparison, which sets a new standard for walkers. Many people, who would think nothing of cycling seventy miles in a day, would be appalled if they were asked to walk twenty in the same period. But the exercise obtained in each case is equivalent. There are hikers, of course, who do twenty-five or thirty miles a day, but there are quite a number who think that, if they walk ten or even less, it is time to catch a bus or train home. Walking is good exercise, but it is necessary, if we are to rely on it for that purpose, to make sure we get enough of it!

To Increase Brain Power

American Scientists Discover Vitamin Known As B4

Ordering a dish of calves' brains with your meal is probably a way to build up your brain power.

The finding of a brain vitamin which gives color to this idea was reported to the American Chemical Society at Cleveland. The new vitamin exists in the largest amounts in brains.

The brain vitamin goes by the name of B4. Its discovery was first reported about a year ago by the University of Wisconsin scientists, who at that time showed it was directly connected with paralysis.

Later work indicates the vitamin may be associated with growth of the brain, particularly those portions which control bodily movements. This report was made by O. L. Klein, C. A. Elvehjem and Prof. E. B. Hart of the University of Wisconsin.

Award Fellowships

Western Graduates Named By Governors Of Toronto University

Awards of four Coughnutt laboratory fellowships by the board of governors of the University of Toronto were announced by President H. J. Cody.

They include Dr. A. C. McGagan, director of the division of communicable diseases of the department of public health, Alberta. Mr. McGagan is a graduate in medicine of the University of Alberta. Dr. E. D. R. Bisset of Pine Falls, Manitoba, a graduate in medicine of the University of Manitoba. Dr. James C. Cull, Hollywood, British Columbia, a graduate of the University of British Columbia in arts and of the University of Toronto in medicine.

Turtle Racing Not Expensive And Races Cannot Be "Fixed"

Turtles have come into their own at last. They are no longer destined to be mocked into soup, for they were the principals in a track event at St. Anthony's church festival in Harrow. Commissioner Clyde W. Curry and Commissioner Norman D. Eganzer own the turtles.

Turtle races are not an expensive undertaking. To begin with, one doesn't need an elaborate track. And turtles don't eat much, at least not the baby snappers. Then, one doesn't need a permit system, or a bunch of clerks to figure odds, because the turtles are all alike. Jockeys, weighers, handicappers, judges, and even the touts who are always seen around any race track, can be dispensed with.

And, turtle races are not fixed, because the layout doesn't permit anything like that. To begin with, the turtles are all put into one aquarium, and when all the bets are placed and it's race time, the turtles are not taken to the barrier, simply because they are not trained to be brought there.

They are scooped out of the aquarium and placed inside a circular wire barricade. When that's lifted, the turtles simply won't believe it and they just stay there, refusing to do anything for about a minute.

Then all at once, one of the seven or eight in the field suddenly starts, and "they're off"—in all directions.

The field is circular, about four feet in diameter, and surrounded with little wooden posts, about two inches apart. The spaces are covered numbers, and the first turtle that crosses over one of the spaces is the "winner." The odds paid are determined by the number marked on the space over which the fastest turtle crosses over. If it happens to be a seven, the winner is paid seven to one, but the spaces marked with a seven are few and far between.

If one wants to make a lot of money, he will have to train a turtle until it is very fast and smart enough to pick the spaces paying the big odds.

THE RHYMING OPTIMIST

By Aline Michaelis

DAWN

Dawn, coming up with its splendor
Blazoned in gold and in blue;
Dawn, with its message of courage,
Old as creation, yet new!

Tasks that are waiting the toiler,
Rest that is waiting the old,
These are the gifts dawn is bringing
Now, as its banners unfold.

Labor and laughter and loving,
Planning and pleasure and pain,
Living with dawn life beginning,
Lifting its ringing refrain.

Dawn, with its promise of power
Setting the restless heart free,
Bringing men's thoughts with fresh
ardor,
Hinting of triumphs to be.

Answer to prayers made in anguish,
Symbol of hope and guidance,
After the night and its doubting,
After the dark, comes the dawn!

Nurse Was Heroine

Rushed Life To Save Hospital From Terrible Disaster

Few stories are more thrilling than that of Sister Thomas, who risked her life to save the main theatre of the Middlesex Hospital from a terrible disaster. One morning the oxygen in a large cylinder caught fire, and a stream of sparks and flames gushed from its mouth. It was a fearful moment, for the condensed oxygen within the cylinder might explode like a bomb any instant and deal death and destruction all round. Everyone left the theatre, and the last of all to go was Sister Thomas, who had stayed behind long enough to remove the ether out of harm's way and to shut doors in order to minimize the effect of the explosion.

Then she did a marvelous thing. She quickly made up her mind to risk burns and possible death in an attempt to save the building itself. She opened the door, ran across to the cylinder, and turned off the tap which supplied the oxygen to the flame. So fierce was the heat that the steel neck of the valve above the tap had been melted. This cool act of courage and self-sacrifice, worth thousands of pounds, and Sister Thomas has been awarded the medal of the Order of the British Empire for gallantry.

A German engineer has invented a steam-driven aeroplane which utilizes oil gas as fuel. The plane is expected to have a cruising speed of 283 miles an hour.

Laws Of Physics

Institute Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKessock at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan, two suspended leaden balls of equal weight. When one ball swinging slowly is struck by one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority of physics points out that of two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the major force. The majority carries. An electric current always is passing from the atmosphere into the earth.

More rice is consumed throughout the world to-day than any other food product.

Of the 156,000 active physicians in the United States, about 100,000 are connected with hospitals.

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 118:76.

Love divine has seen and counted Every tear it caused to fall; And the storm which Love appointed Was its choicest gift of all.

O that thou couldst dwell in the knowledge and sense of this even that the Lord beholds thy sufferings with an eye of pity, and is able not only to uphold thee under them, but also to do thee good by them. Therefore grieve not at thy lot, be not discontented, look not at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience who can lift up thy head over all, and can cause thy life to grow and be a gain to all. If the Lord God help thee according to thy condition of affliction and distress thou wilt have no cause to complain, but wilt bless His name.—L. Pennington.

A sense of humor is a great help when one is without funds.

A Big Change

Lord Willington went from Creighton to Delhi in a week. So much has air travel accomplished. When the first Viceroy, Canning, went to his duties in 1858 the trip took more than five weeks. Steamships were slow, and there being no Suez Canal the way was round the Cape.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile
—Without Calomel
Your liver is a very small organ, but it generally can get your digestive and eliminative processes of life by making to your cell the daily two pounds of liquid bile into your veins. You want completely renewed each week a condition by taking saline, oil, mineral water, laxative ready or having fun or massage. When they're moved your horses they're through—and you need liver stimulants.
Carter's Little Liver Pills will soon bring back the normal life. They're perfectly reliable. Safe. Sure. Ask for them by name. Beware substitutes. See at all druggists.

An auto-aid attachment has been designed for telephones in England that reduces the number of motions from seven to two when getting a number.

Average income of a doctor is about \$5,000 a year, and that of a surgeon \$5,000.

Now..
AIR-CELL BRINGS AN ENTIRELY NEW THRILL IN RADIO

.. TO HOMES NOT HAVING ELECTRICITY!

"Here's the big ball game this afternoon. Jim-cans in clear at a bell too. No, we haven't electric wiring in our house, but our new Air-Cell radio sounds every bit as good as one connected to the city."
"I used to get into town every time the storage battery ran down. This new radio uses an Air-Cell battery that never needs recharging. I don't mind staying home, though, because our Air-Cell set brings in programs we never heard clearly before."
"That new Air-Cell radio is a wonderful convenience. Our old storage battery was always giving trouble, and half the time we couldn't get the music loud enough. This new set has an even current that you can hear perfectly all the time."

EVEREADY RADIO BATTERIES

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone libretto only heard in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 100 hours, which at 2 hours a day is almost a year's service in the average household, and so does not need any special care, expense and loss of time due to frequent recharging.

Used in conjunction with EVEREADY laybrite "B" Batteries, Air-Cell radios, made by the leading radio set manufacturers, will add all the simplicity and reliability of electric set.

Ask your radio dealer for a demonstration.

Approximately 100 families have been moved to date this season from the drought areas of south-eastern Alberta to new locations in the north country. This is far below the figures expected, when arrangements for the free movement were made, and while there will be some further movement this fall, there will be, government officials now believe, no heavy exodus from the dry belt.

Purchases and shipments of sur-

plus cattle under the new plan recently announced by the provincial government are to begin at once it is stated by Hon. F. S. Giesdale, minister of agriculture, arrangements having been completed with the federal government and railway companies. Between 7,000 and 8,000 head of cattle will be bought from farmers in the dry areas and taken to the Edmonton and Calgary stock yards and is expected

that the first shipments will arrive early next week. Instructions have gone out to field men representing the department to commence operations at once. Cattle from the southern part of the dry area will be shipped to Calgary and from the north to Edmonton, the Hamaruka railway line being the dividing line. Claud Campbell, Hanna, and J. T. Holland, Fleet are the government representatives in charge for the respective territories.

Town & District

Next Monday will be Thanksgiving Day and a public holiday.

Some 85 school fairs were held in the province this year, according to a report just compiled.

Glen's News has opened up again under new management. They will have all the latest magazines and newspapers on sale.

A meeting of the Boy Scouts will be held on Friday evening, October 5th, at 7:30 in the Community Hall Club Room.

Rev. J. R. Davies, who left here several years ago for Aceme, is now located at Ogden and is in charge of St. Augustine's church there.

Mr. and Mrs. Wm. Cunningham and baby Jenn of Calgary were in town the first of the week to attend the funeral of Mr. Cunningham's father.

M. Moynies, a prominent farmer of the Cluny district spent a short time in town Monday on business. Mr. Moynies hoped to start threshing Tuesday morning.

St. Andrew's Church tea in the Legion hall last Saturday afternoon proved to be a very successful affair.

A number of Gleichen Masons attended the Strathmore lodge meeting Monday night. A feature of the meeting was a trip through Europe with a moving camera. All the members who went from Gleichen enjoyed the evening.

TO TRY OUT HEALTH INSURANCE IN TWO UNITS FIRST

The public of Alberta is evidently quite prepared for a complete try-out on a small scale of the health insurance proposals recommended in the report of the commission on state medicine presented to the Alberta Legislature at last session, and most classes concerned are already to give full co-operation in such experiment, to judge by the feeling evident at the general conference on the subject held last week at the University of Alberta. Indication of this attitude was given by representatives of various organizations most vitally concerned in the proposals. It was made abundantly clear during the conference both by Hon. George Hoadley, Minister of Health and Dr. A. C. McGowan, who was secretary to the commission, that it was not the intention of the Alberta government to carry out the proposals of the commission for certain health insurance plans, on any wide scale, until such time as experimentation on a small scale had established the soundness of the proposals. The plan is that while legislation will prob-

ably be introduced at the coming session to give the proposals legal status, yet it is the intention to carry out an experimentation first in only two so-called health units, one being an urban and the other a rural unit.

Hon. Mr. Hoadley declared the problem to be solved was the greater distribution of health services among the people. The province was amply equipped now with all that was necessary in the way of facilities and professional ability to give full service to the people. The situation was that an increasing number of people found it impossible to finance health services they needed, while doctors were reaching the point where it would be impossible much longer for them to go on giving services without adequate return. He paid a tribute to the medical men, dentists and nurses who were in these difficult times giving a tremendous amount of service without any hope of financial reward. Our problem is to solve the difficulty of the pooling of costs and the paying capacity of the people, after which we must concentrate on the distribution of health services. Under a health insurance plan it would be possible, he said, to regulate the quality of service given to the people. Humanity was not a playing field in the operating room, nor should we gain experience by unnecessary human suffering.

DOMINION OF CANADA

1934 REFUNDING LOAN

The Minister of Finance offers for public subscription

Two-year 2% Bonds, due 15th October, 1936

Issue price: 98.80 and accrued interest, yielding 2.67% to maturity.

Five-year 2½% Bonds due 15th October, 1939

Issue price: 98.16 and accrued interest, yielding 2.90% to maturity.

Eight-year 3% Bonds, due 15th October, 1942

Issue price: 97.00 and accrued interest, yielding 3.48% to maturity.

Fifteen-year 3½% Bonds, due 15th October, 1949

Issue price: 96.50 and accrued interest, yielding 3.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada. Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations

Two-year Bonds, \$1,000
Five-year Bonds, \$500 and \$1,000
Eight-year Bonds, \$500 and \$1,000
Fifteen-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

- 100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.
- 100½% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.
- 100¼% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$222,216,250 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 13th October, 1934, with or without notice, at the discretion of the Minister of Finance.
